# **Fast-Cooking Cream-Seeded Kersting's Groundnut for Benin**

**Dr Eric Agoyi** University of Abomey-Calavi, Benin

### Design target

Fast-cooking and palatable cream-seeded kersting's groundnut for the urban markets of Benin and neighboring countries

Dr Eric Agoyi leads the Legume breeding programme at the Laboratory of Applied Ecology, University of Abomey-Calavi. Eric's main interest is on three important legumes: kersting's groundnut (Macrotyloma geocarpum (Harms) Maréchal & Baudet), grain and vegetable soybean (Glycine max) and common bean (Phaseolus vulgaris). He has over 8 years' experience as legume Breeder. He extensively works with soybean Breeders at the National Soybean Research Lab (NSRL) from the University of Illinois-Urbana-Champaign, USA, and the Common bean Breeders at the Alliance Bioversity-CIAT. He holds a PhD in Plant Breeding & Biotechnology from Makerere University and he is a graduate of the University of California-Davis, USA through the African Plant Breeding Academy. He was also honored to implement and train for Gender Responsive Plant Breeding (GREAT). He has successfully selected pure elite lines of groundnut which kersting's undergone extensive evaluation for variety release.
